

AlpinaTec Technical Products is a development office specialized in customer-specific solutions in the field of industrial automation, located in Flachgau, Salzburg. From the idea to the concept, up to the final commissioning on site, we have been implementing national and international complete projects for research & development, for the manufacturing industry as well as for the aerospace industry for more than 20 years.

For the GESTRA special project, we are expanding our team from April 2021 with a strong leadership personality:

Design Manager Team Leader

The GESTRA radar system monitors low-Earth orbit, locates, maps world space debris and satellites in orbits of space.
